

# Pratikshit Singh

Delhi, West Delhi 110059, India | +91-8178377699 | [rajikumarranjeeta1@gmail.com](mailto:rajikumarranjeeta1@gmail.com) | [LinkedIn](#) | [GitHub](#)

## PROFILE

B.Tech Information Technology student at NSUT with backend engineering experience in FastAPI and PostgreSQL, and applied AI experience with LLMs, RAG, and embeddings. Built a full-stack fintech application with REST APIs, database design, and an LLM-powered chatbot for financial insights.

## EDUCATION

**Netaji Subhas University of Technology (NSUT), Delhi**

*B.Tech in Information Technology*

XIth: 94.2% — Xth: 82.4%

08/2024 – Present

*Current CGPA: 8.24/10*

## PROJECTS

**BudgetBuddy — AI-Powered Personal Finance Assistant** | FastAPI, PostgreSQL, JavaScript, Chart.js, JWT

[GitHub](#)

06/2026 – 07/2026

- Developed a full-stack personal finance platform with secure JWT authentication and monthly budget management.
- Designed and implemented 15+ RESTful APIs for authentication, expense management, budgeting, analytics and monthly insights.
- Performed database design and modelling in PostgreSQL, and optimized expense retrieval by fetching month-specific records instead of complete history, reducing unnecessary queries.
- Built a group expense-splitting feature enabling users to create friend groups, log shared expenses with a designated payer, and automatically split costs equally – calculating real-time balances of who owes whom.
- Built a ReAct-pattern AI agent from scratch with 8 custom tools for expense CRUD operations, PDF/CSV report generation, and spending analysis, enabling the LLM to reason over user queries and autonomously select appropriate action.
- Designed a "Month Battle" feature comparing two arbitrary months category-by-category, scoring each category win to determine the lower-spending month, and visualized spending trends and budget health via interactive Chart.js dashboards.

**AI Resume Evaluator** | FastAPI, Python, LLMs, Pydantic, PostgreSQL

[GitHub](#)

08/2026 – Present

Built a full-stack AI recruitment platform with LLM-driven resume parsing, ATS scoring, and JD-based candidate matching for candidate and recruiter workflows.

- Engineered an evidence-based ranking engine for batch-processing 100+ resumes, auto-classifying candidates into Shortlist/Maybe/Reject with transparent explanations.
- Developed an AI mock-interview module scoring candidates on technical knowledge, communication, and problem-solving from resume+JD context.
- Implemented secure JWT/RBAC authentication with async background task processing for scalable, non-blocking resume handling.

## TECHNICAL SKILLS

**Languages:** C++, Python, JavaScript, Java

**AI/ML:** LLMs, RAG, Embeddings, Prompt Engineering

**Frontend:** HTML, CSS, JavaScript, Chart.js

**Backend:** FastAPI, SQLAlchemy, Alembic, REST APIs, Pydantic

**Databases:** PostgreSQL, SQL

**Tools:** Git, GitHub, VS Code

## RELEVANT COURSEWORK

Data Structures and Algorithms, OOP in Python, DBMS, Operating Systems, Computer Networks.

## ACHIEVEMENTS

- Solved 685+ DSA problems across [LeetCode](#), [GeeksforGeeks](#), and [Codeforces](#).
- Achieved a **1660 LeetCode rating** and secured a **Top 6K rank in 8 contests**.
