

Full Stack Engineer Intern

What you'll do

As an intern at Fundwave, you'll contribute across the full stack - database structures, backend logic, APIs, and UI. You won't be siloed into one layer. You'll sit alongside engineers, designers and product managers, pick up real projects, and see your work go live.

What we're looking for

Experience

- Pursuing Bachelor's Degree in Computer Science or related technical field
- Prior technical internship experience in a real engineering environment

Technical

- Experience with JavaScript or Java (beyond just coursework)
- Experience with databases (SQL or NoSQL)
- Experience with back-end programming in any language
- Solid knowledge of semantic HTML, CSS, Wireframes, and responsive design
- Understanding of core web and browser concepts (eg. how the browser parses and constructs a web page)
- Experience with Bash / Linux shell
- Experience using Git in a professional/workplace environment.

How you work

- Outstanding interpersonal skills and problem solving skills
- Ability to work independently and know when to ask for help
- Communicates clearly with engineers and non-engineers alike
- Strong quantitative analytical thinking capabilities
- Fluency in English. Fluency in other languages is a plus

Nice to have

- Working knowledge of AWS or GCP
- Knowledge of Java frameworks such as Spring, JPA / Hibernate
- ES6 and JS frameworks such as ReactJS, Angular 4+, Vue, LitElement
- Experience with writing automated tests

- Chef experience (writing complex cookbooks from scratch, custom providers, custom resources, etc.)
 - Background in Accounting, Private Equity / Venture Capital / Investments, SaaS
 - Experience in working closely with product managers or working with a multicultural team
-

About Fundwave

Who do we serve, and why?

Fund managers – managing venture funds, private equity funds, crowdfunds – are our heroes. Our products help fund managers stay focused on building the next great start-up or spin the wheels faster at a blue chip.

What's it like for you?

At Fundwave, you'll change the way Venture Capital will operate in the future. Your work will help create the building blocks that'll improve the innovation ecosystem, consisting of fund managers, investors and startups.

You'll work with customers who are advocates of your product, bounce off ideas with friendly team mates, and grow in an entrepreneurial culture.

How's the money like?

We're all eligible for equity awards, and we have big plans. That means when we play together, we win together.

Is there a work-life balance?

Here at Fundwave, life is good. We have flexible hours, loads of time off, and awesome events. There's a dedicated learning and fitness budget to support everyone's growth & development.

Is this for you?

If you're a nerd about your area of interest, have a bias for creation, and ready to contribute in a collaborative environment, we are just the team you're looking to join!
